# Data lives in silos

Lack of real-time visibility into team's progress, hinders your ability to make informed decisions.

Collating and deriving insights from version control system(VCS), Project Management tools & other saas tools is hard.

The struggle is real

## Endless spreadsheets

Manually copying and pasting data eats time and breeds errors.

## DIY dashboards

Building and maintaining them eats resources and limits functionality.

## In-house automations

They're fragile, bandwidth-consuming and maintenance heavy.
